1. PRESENTATION

This report offers an overview of the research activities that have taken place at the IAE (Institute for Economic Analysis) during the years 2019 and 2020. As a center of CSIC (Higher Council for Scientific Research) the mission of the IAE is to produce policy-relevant research in economics of the highest academic standard and also to train young researchers.

We produce theoretical and empirical papers that cover a variety of fields, including labor economics, immigration and development, industrial organization, political economics, macroeconomics and growth, microeconomics, game theory, and experimental economics. Recent rankings recognize the IAE as a leading European institution for research in Economics. The numerous studies undertaken by the IAE’s researchers produce a steady output of top publications in international scientific journals.

We have a post-doctoral program with a long tradition. It is a privileged launching pad for brilliant careers in economics research. Recently, one of our researchers, Ursula Mello, has been awarded the AXA postdoc fellowship which will allow her to continue her work at IAE until 2023.

In addition, during this period two new researchers have been awarded permanent CSIC positions and will join the IAE during 2021: Jaume Freire (from ENT Foundation. PhD in Economics, Universitat Autònoma de Barcelona, 2012) as Research Scientist and Angel Lopez (from the Department of Applied Economics at Universitat Autònoma de Barcelona. PhD in Economics, Toulouse School of Economics, 2007) as Tenured Scientist.

IAE is a founding partner of the Barcelona Graduate School of Economics, an academic institution that promotes excellence in research and offers world-class graduate programs. The Barcelona GSE is considered a top institution in Economics in Spain and has been granted the Severo Ochoa Research Excellence accreditation since 2011.

The IAE has a close collaboration with the Department of Economics and Economic History of the Universitat Autònoma de Barcelona: we co-organize different seminar series and we participate in their International Doctoral Program in Economic Analysis (IDEA) teaching and supervising doctoral students. Our research agenda also includes specialized conferences and workshops, regular invited seminars, and dissemination talks.
